

UNILOG... YOUR ONE CARD SOLUTION!

CARD SYSTEM
FOR VENDING AND POINT OF SALE

AND CONTROL

UNILOG GOLD

The Unilog Gold Software is the Master Unit of the Unilog System. This powerful software enables you to consult the sales reports and the balance of each account in real-time. Furthermore, the Unilog Gold Software offers you very interesting features such as: immediate suspension of a lost card, creation of alias cards pointing to a single master account, creation of multiple profiles perfectly suited to each group of employees giving either access, subsidies, credit margin and even an expiry date.

On the security level, this powerful Software executes automatic back-ups and even sends periodic reports by email to the destination of your choice. Furthermore, the access is restricted to authorized personnel.

Unilog reader type	Card technology	Network system requirement	Cash balance memory	Detailed transactions report
Unilog Smart	Memory chip	None	In the card	POS* only
